**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Jen (5,417,352). Jen teaches a hook for a hanger having two fastening means that would be suitable for fastening bottle-shaped containers to the hook portion.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jen (5,417,352). Jen teaches all the limitations of Claim 18 in the instant application, but fails to specifically claim the fastening means of the hanger having a thread as claimed in Claim 19. With respect to Claim 20, Jen does not specifically teach that the hook portion of the hanger be a plastic injection molded part. The fastening means of Claim 19 and the fastening of Jen are deemed to be art equivalents and would have been obvious to substitute one for the other. Furthermore, plastic injection molded parts are well known in the art and it would have been

obvious to one of ordinary skill in the art at the time the invention was made to have made the hanger of Jen with a plastic injection molded hook portion.

*Allowable Subject Matter*

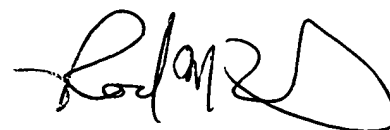

5. Claims 11-17 and 21-30 allowed.
